

Law of Attraction Philosophies of Law of Attraction Teachers/Experts

Neville Goddard:

Neville Goddard was an influential New Thought leader who emphasized imagination and feeling as the primary forces behind the Law of Attraction. He believed that individuals could manifest their desires by assuming the feeling of their wishes fulfilled. His teachings focus primarily on the power of imagination and feelings to manifest reality.

Some of the key points from Neville Goddard's teachings related to the Law of Attraction:

1. **Imagination Creates Reality:** His main teaching is that it's your imagination that shapes your reality. He believed that everyone has the power to manifest their desires simply by imagining them in detail.
2. **Living in the End:** He taught the technique of "living in the end," which involves imagining and feeling as if your desire has already been fulfilled. This feeling, according to Goddard, is the key to manifestation.
3. **Assumptions:** He believed that if you assume the feeling of your wish fulfilled and continue living as if your desire has already manifested, it will eventually become your reality.

4. Sleep Technique: One of his specific techniques involves visualizing your desired reality just before you go to sleep. This helps to impress your desires upon your subconscious mind.

5. Control of Thoughts and Feelings: He emphasized the importance of controlling your thoughts and feelings, as they are the raw materials of your reality.
